

6th European Workshop on Epitaxial Graphene and 2D Materials

Thursday, May 16, 2024

Session 6: Chair - NH Hotel (9:00 AM - 11:00 AM)

| time | [id] title | presenter |
|----------|--|---------------------|
| 9:00 AM | [95] Quantum Functionality in 2D materials: From Moiré Structures to Quantum Confined Devices | LUICAN-MAYER, Adina |
| 9:30 AM | [97] Engineering flat bands in twisted bilayer graphene | ZHOU, Shuyun |
| 10:00 AM | [26] Self- and hetero- transition metal intercalation in between bilayer VSe ₂ | BATZILL, Matthias |
| 10:20 AM | [78] Disentangling the Electron Scattering Mechanisms of Hexagonal Boron Nitride | RØST, Håkon |
| 10:40 AM | [64] High-performance electronic devices enabled by atomically sharp interface of van der Waals heterostructures | BAO, Lihong |
