

Workshop on liquid systems: science and standards for delivery

Monday, December 4, 2023 - Tuesday, December 5, 2023

Elettra, Trieste, Italy

Book of Abstracts

Contents

Liquid jet development at FERMI	1
Femtosecond laser micromachining: an enabling tool for liquid jet in a chip	1
Liquid sample delivery at EuXFEL	1
Putting classical nucleation theory to the test: cavitation in water droplets and crystallization in krypton jets	1
Studying deeply supercooled liquid water with X-ray emission spectroscopy	1
Recent computational studies of the liquid-liquid transition in supercooled water	1
Ultrafast circular dichroism in the deep ultraviolet: a new approach for capturing structural molecular dynamics in solution	1
Let the Data do the Talking: Insights from Molecular Simulations of Water	2
Multisite Probes for Chemical Dynamics	2
Flatjets for photoemission studies of liquid–liquid and liquid–gas interfaces	2
New spectroscopic challenges from liquid jets	2
Shapes of drops of complex fluids	2
Introduction	2

Liquid sample delivery: technical development / 9

Liquid jet development at FERMI

Corresponding Author: marija.krstulovic@elettra.eu

Liquid sample delivery: technical development / 10

Femtosecond laser micromachining: an enabling tool for liquid jet in a chip

Corresponding Author: rebecca.martinez@polimi.it

Liquid sample delivery: technical development / 11

Liquid sample delivery at EuXFEL

Corresponding Author: joana.valerio@xfel.eu

Liquids at extreme conditions / 12

Putting classical nucleation theory to the test: cavitation in water droplets and crystallization in krypton jets

Corresponding Author: frederic.caupin@univ-lyon1.fr

Liquids at extreme conditions / 13

Studying deeply supercooled liquid water with X-ray emission spectroscopy

Corresponding Author: claudia.goy@desy.de

Liquids at extreme conditions / 14

Recent computational studies of the liquid-liquid transition in supercooled water

Corresponding Author: francesco.sciortino@uniroma1.it

Molecular systems / 15

Ultrafast circular dichroism in the deep ultraviolet: a new approach for capturing structural molecular dynamics in solution

Corresponding Author: malte.oppermann@unibas.ch

Molecular systems / 16

Let the Data do the Talking: Insights from Molecular Simulations of Water

Corresponding Author: ahassana@ictp.it

Molecular systems / 17

Multisite Probes for Chemical Dynamics

Corresponding Author: r.ingle@ucl.ac.uk

Interfaces / 18

Flatjets for photoemission studies of liquid–liquid and liquid–gas interfaces

Corresponding Author: winter@fhi-berlin.mpg.de

Interfaces / 19

New spectroscopic challenges from liquid jets

Corresponding Author: luca.longetti@psi.ch

Interfaces / 20

Shapes of drops of complex fluids

Corresponding Author: christophe.blanc@umontpellier.fr

Liquid sample delivery: technical development / 21

Introduction
