Tue, June 24

11:15 AM

Session 6 - Chirality II: Chirality II

Session

11:15 – 11:45 AM

Ultrafast chiro-optical spectroscopy

Speaker

Giulio Nicola Felice Cerullo

11:45 AM – 12:05 PM

Modeling plasmonic effects in photoinduced molecular processes

Speaker

Emanuele Coccia

12:05 – 12:25 PM

Ultrafast photodynamics and detection of the elusive twist-wagged intramolecular charge transfer (TWICT) state of N⁶,N⁶-dimethyladenine (DMAde) by transient vibrational absorption spectroscopy

Speaker

Friedrich Temps

12:25 – 12:45 PM

Excited state dynamics of azanaphthalenes

Speaker

Lauren Bertram

12:45 PM
