

MXCUBE/ISPYB MEETING

ISPyB & SciCat future plans at MAXIV

Alberto Nardella

Alberto.Nardella@maxiv.lu.se

TRIESTE NOV 28-29 2024

Summary

- MX metadata problems & tasks to do 
- ISPyB & SciCat timelines 
- Sample Management 
- Teams 

MX metadata in SciCat

- Database problems
 - Current MongoDB indexes need to be rebuilt.
 - Test if MongoDB can manage the amount of metadata produced at BioMAX and MicroMAX.
 - Investigate if MongoDB can search efficiently the data the user needs.
 - Redesign the schema to fit the new needs (multisweep, multicroystal, reprocessing,...).

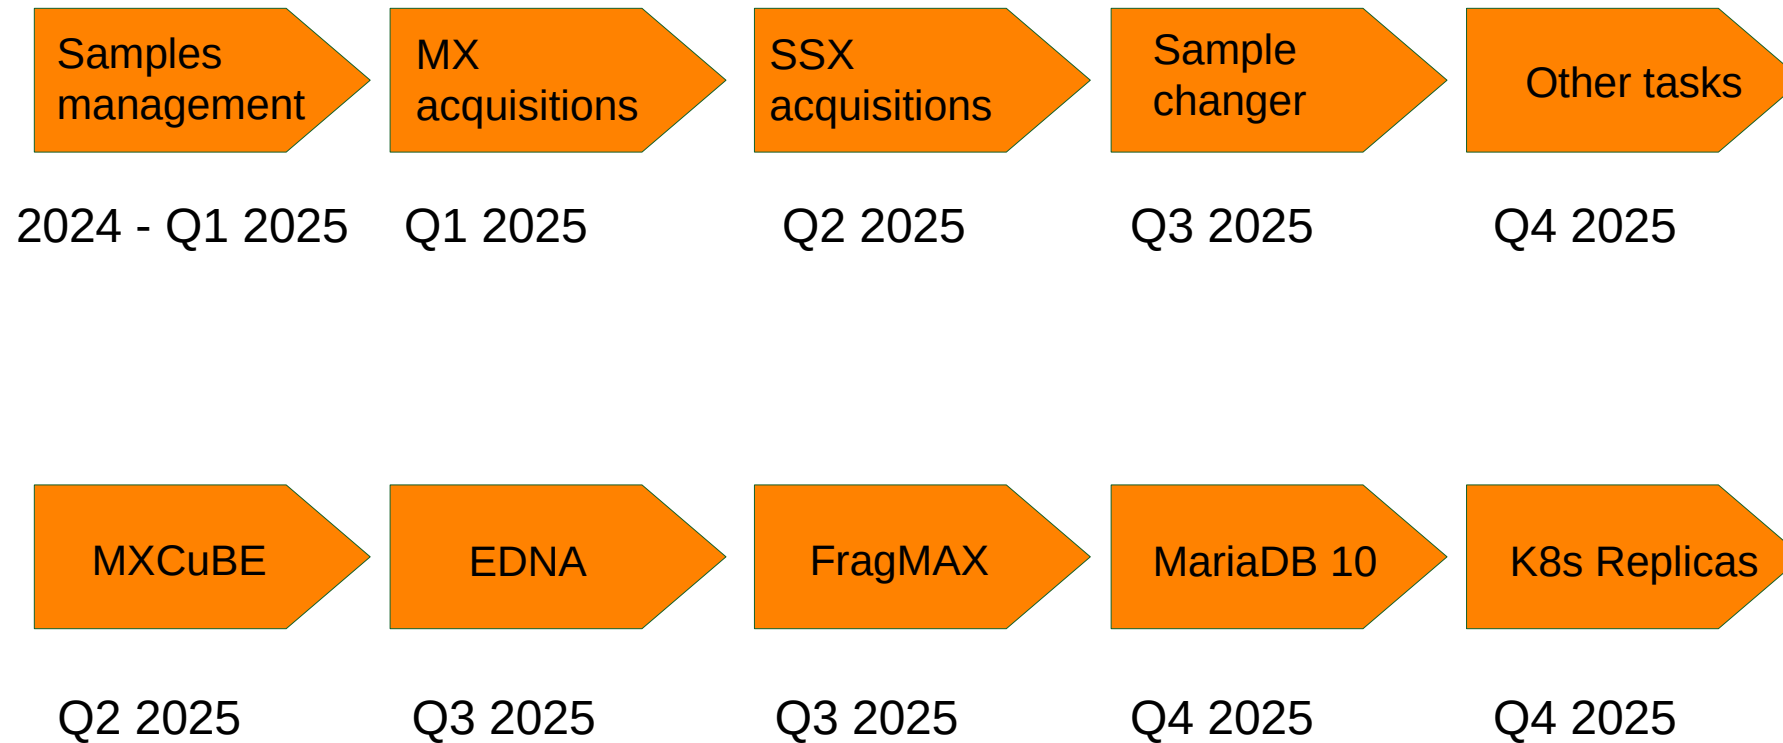

MX metadata in SciCat II

- Back-end tasks
 - Improve ingester of MX metadata into SciCat.
 - Develop all the entry-points used by MXCuBE & the pipelines running at BioMAX, MicroMAX and FragMAX.
 - Develop the entry-points used by the front-end to show the data.
 - Develop the entry-points used by third-party applications (e.g., IceBear) to get and push the data.

MX metadada in SciCat III

- Front-end tasks
 - New widget components to be developed (XRF scan, Energy scan, Generic MX, SSX, Mesh).
 - Improve the layout. It seems like the TopCat I tested more than 15 years ago!
 - Focus on the User experience.

Py-ISPyB timeline

SciCat timeline for MX metadata

IMPORTANT

- We should consider an extra cost due to the collaboration with other facilities with or without MX metadata.
- We need to reduce the impact in the core of SciCat to avoid to cause problems to other beamlines or facilities.
- +1 or +2 years?

Samples management

- Several beamlines need to manage samples and shipments so created an official request.
- We need to take advantage of the opportunity:
 - Show py-ispyb samples management as a starting point.
- Create a new Samples Management tool or upgrade py-ispyb in order to manage both MX and no MX beamlines samples.
 - It will be part of the SciCat zoo in the future?

ISPyB & SciCat teams at MAXIV

ISPyB (2014-2023)

FS

SciCat (2018-2024)

FS FS

SciCat + ISPyB (2027-2030)

FS FS FS FS FS FE DBA

ISPyB (2024-2025)

FS FS DBA

SciCat (2025-2026)

FS FS FE DBA

Full Stack
Front End
DB Administrator

Thank you very much
