

Session Program

May 20 - 21, 2026

NICE2026 Nonlinear Imaging and Coherent Effects

Multidimensional Spectroscopic

Latisana, Italy

Thu, May 21

8:45 AM

Multidimensional Spectroscopic

Session | Location: Latisana, Italy

8:45 - 9:20 AM

Linear and non-linear X-ray studies of chirality in liquid solutions

Speaker

Prof. Majed Chergui

9:20 - 9:55 AM

Amplification of weak spontaneous emission from low-lying doubly excited states in helium gas

Speaker

Prof. Matjaz Zitnik

9:55 - 10:20 AM

Attosecond momentum-resolved resonant x-ray scattering of photo-excited molecules: observing charge in motion.

Speaker

Maksim Radionov

10:20 - 10:40 AM

Sum-Frequency Generation Spectro-Microscopy using the FHI-FEL

Speaker

Dorothee Mader

10:40 AM
